Summary

Dedicated and motivated graduate with a strong academic foundation and a passion for Artificial Intelligence. Proficient in programming languages, data structures, and algorithms and possess a moderate base for problem solving. Co-authored an research paper in the field of Natural Language Processing that is currently being reviewed by a prestigious Q1 journal publication. Able to work well in a team to effectively translate theoretical knowledge into projects that have a real-world impact. I'm eager to achieve success in rapidly evolving IT industry alongside passionate academics.
